Janet:

I still haven't seen any NOIs or NPDES applications for any facilities with those names. The only new coal mine related NOIs we've received lately were for AML sites which DNR is working to clean up. If you like, I can contact my DNR folks to find out more info about these new proposed mines.

Catherine,

Thank you for your continued vigilance for any 402 applications/ NOIs re the United Mineral's Seven Hills mine.

I have just been asked to add another mine name to the notification list under United Minerals as well- High Pointe Mine.

This would be in the same county Warrick and adjacent to the Seven Hills mine, as they are to share a slurry pond.

Thanks much,

Janet

Subject: United Mineral's Seven Hills

Hi Catherine,

I was asked to inquire regarding United Mineral's Seven Hills mine, a 2,350 acre surface mine south of Lynnville in Warrick County, IN.

It appears the site has its SMCRA permit already, but if you could let me know if they have applied for a NPDES permit yet, whether its under the GP or an individual NPDES permit and send any documentation related to the application/ NOI would appreciate it.

Thanks much
